Daylight Saving Time (DST) version 1.0.0-2 Patch Update Procedure

Preparation

NOTE: This patch update may be performed on IFM card running Linux OS at all versions

1. Before performing this procedure, “share” the CD-ROM drive on the host PC. (This will permit copying the files.)
2. Connect the Courier IFM Card to the host computer using *one* of the three methods shown in the following figure:

Updating with Microsoft Internet Explorer

1. Start Internet Explorer by double-clicking the icon shown below:

2. Enter the Courier IFM IP address (the default address is http://192.168.0.9) and press the **Enter** key, or click **Go**

3. Login with User Name "**panasonic**" and Password "**password**", Click **OK**.

4. At the Monitoring System's welcome screen, click the **File Transfer** icon as shown below:

5. Click the **Browse...** button as shown below:

6. Select (highlight) the update file from the CD-ROM drive of the host PC.

7. Click the **Upgrade** button to allow your browser to start sending the selected file to Courier IFM.
8. Confirm the result of a successful file transfer on the screen.
9. Reboot the Courier IFM by pressing its **SAFE** mode pushbutton.
10. The upgrade installation is now completed.

11. Verify the completion of the Daylight Saving Time(DST) patch to IFM system by entering the courier IFM IP address (the default address is <http://192.168.0.9/ifttimeinfo.html>) and press the **Enter** key, or Click **Go**

The web browser will display the current time and the time zone. If you have any questions, call technical support.
